

# Using Zoom with KHCONF

This document provides details on how to integrate Zoom video conferencing with KHCONF *Stream* (KHCONF). This integration allows publishers who use KHCONF tie lines to access congregation meetings in a familiar way and allows the congregation to stream meetings with KHCONF from any location. Please note, when used with Zoom, some features of KHCONF, such as participant commenting, may be limited.

## Integration Configuration

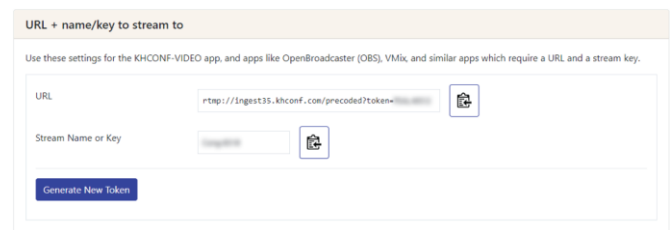

### In Zoom, enable *Custom Live Streaming Service*

1. Sign into [Zoom web portal](#)
2. Go to **Account Management > Account Settings**
3. Navigate to *In Meeting (Advanced)* and enable *Allow live streaming meetings*
4. Enable *Custom Live Streaming Service*
5. Verify that [Group HD video](#) is disabled

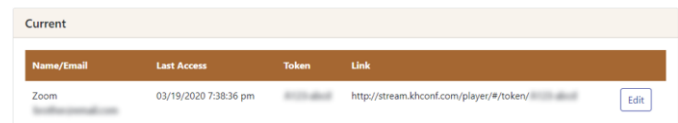

### In [KHCONF Reports](#), copy the Video Stream settings to the Zoom *Custom Live Streaming Service* settings.

1. Go to **Account Settings > Video Streaming Settings**
2. Copy and paste both the *URL* and *Stream Name or Key* information from KHCONF to the Zoom *Custom Live Streaming Service* settings

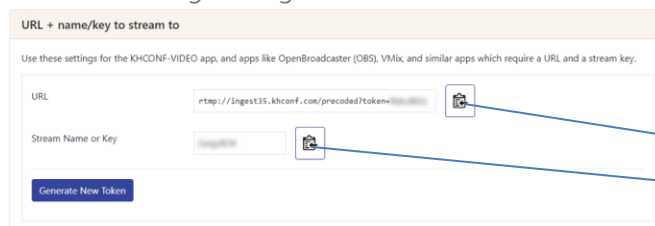

### In [KHCONF Reports](#), create a Video Viewer for the integration and copy the settings to Zoom

1. Create a Video Viewer using the e-mail address of the Zoom meeting host
2. Copy and paste the Video Viewer *Link* from KHCONF to the Zoom *Custom Live Streaming Service* settings
3. Click *Save* in Zoom, saving the *Custom Live Streaming Service* settings

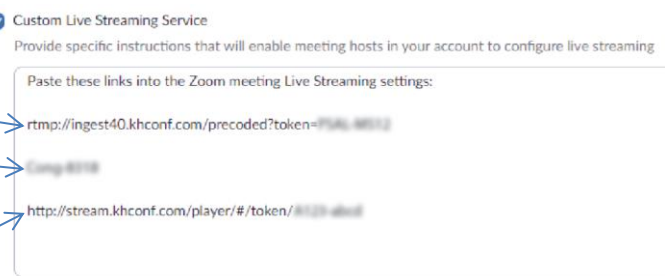

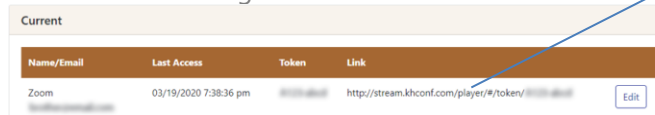

The settings should now be copied as follows:

Video Streaming Settings:

Video Viewer Settings:

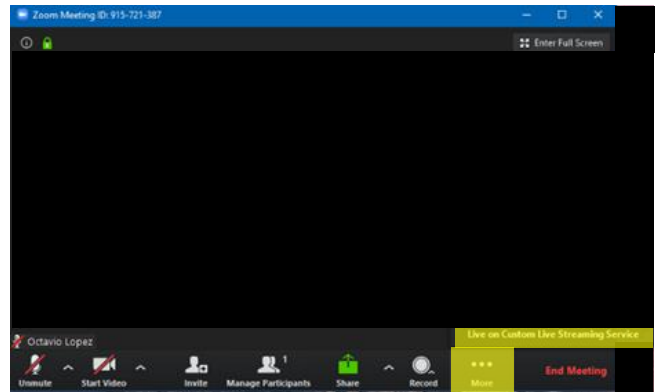

## Meeting Setup

### Start the Zoom meeting

Once the above integration is complete, Zoom is used to initiate the connection to KHCONF.

1. Open Zoom and start the meeting
2. Go to **More > Live on Custom Live Streaming Service**

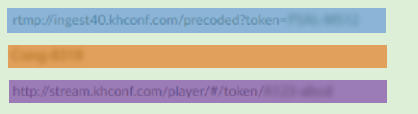

### Copy the settings and start the stream

The information from KHCONF should now be displayed in the correct order to start the stream.

1. Copy KHCONF *URL to Zoom Streaming URL*
2. Copy KHCONF *Stream Name or Key to Zoom Streaming Key*
3. Copy KHCONF *Video Viewer Link to Zoom Live streaming page URL*
4. Click **Go Live!**

### Live stream the Zoom meeting to a custom service

Paste these links into the Zoom meeting Live Streaming settings:

Streaming URL

Streaming key

 Show

Live streaming page URL

Everyone who uses this link can watch the live broadcast

### Stream from Zoom will now feed to KHCONF

1. The "Preparing to live stream the meeting" message will be displayed for a few moments
2. Once a black screen is displayed, the stream has begun (it may be necessary to click the screen)

KHCONF is now streaming all audio and video presented during the Zoom meeting. Publishers can now connect to KHCONF as normal to access to the Zoom meeting stream.

For additional information regarding the use of KHCONF, see *Kingdom Hall Conferencing System*. (Log in to your [jw.org](http://jw.org) account. Go to FORMS > Kingdom Hall > Kingdom Hall Conferencing System.) Technical assistance can be found on the [KHCONF Reports](#) site. For assistance with using Zoom, please see the [Zoom Help Center](#).
