Re: Installation of projection equipment

Dear Brothers:

The branch office has received a number of enquiries regarding the purchasing of projectors and screens for installation in Kingdom Halls.

We are currently working to select an appropriate projector. Once this process has been completed, details will be posted as a Supplier Arrangement on the jw.org website. We will then encourage all Kingdom Halls in Britain and Ireland to install equipment so that the congregation can watch video presentations.

Until details of the branch-recommended projector are made available, please do not purchase a projector or screen for the Kingdom Hall. If you have a forthcoming event that requires use of a projector, it would be best to borrow or hire this equipment.

In preparation for the installation of video equipment, it would be beneficial to arrange for a broadband internet connection to be obtained for the Kingdom Hall. Please see the Global 4 Supplier Arrangement on jw.org for details for Kingdom Halls in Britain and Northern Ireland.

We thank you for taking note of these recommendations. Please be assured of our warm Christian love and greetings.

Your brothers,
*Christian Congregation
of Jehovah's Witnesses*
