Re: Kingdom Hall projection equipment

Dear Brothers:

We are writing to provide an update regarding the supply of projectors, screens, and ancillary items for Kingdom Halls.

Over recent months, negotiations have been taking place to obtain high-quality, competitively-priced Panasonic video projectors. This supplier arrangement will be released to jw.org imminently. We encourage you to place an order promptly once this arrangement is released.

The total cost of the equipment is expected to be around £1,120 (€1,420), with the projector alone costing £820 (€1,027). The purchase of the equipment should be funded by the congregation. In view of the adjusted arrangements now in place for the finance of Kingdom Hall projects, you may need to save funds towards this purchase.

It would also be prudent to consider how the installation will be carried out. If there are local publishers competent to install the projector (which will be ceiling-mounted in most halls), no outside assistance will be required. If there are none available locally who are competent to carry out the installation, please contact the Regional Building Committee to seek assistance.

We thank you for your support in connection with this matter and take this opportunity to assure you of our warm Christian love and greetings.

Your brothers,

*Christian Congregation
